Mr. Rodney Stockton
750 Northwest 38 Street
Fort Lauderdale, FL

Dear Rodney:

When I met you several years ago, I had just had three surgeries for skin cancer. I heard about the ability of aloe to make the immune system stronger and to fight cancer; and I started drinking your aloe twice a day. Since then I have not had any recurrence of skin cancer.

I am a runner (average 30 miles per week) and also work out with weights, ride my bike and do other aerobic workouts, so having a stronger immune system is important. Training for a marathon (I have run seven marathons so far) puts a lot of stress on one's body, but the aloe has helped me tremendously to stay strong and healthy.

My husband and I both drink Aloe Number One aloe, and we both have experienced the many benefits of aloe. He is 59 years old and I am 58 years old, but because of our healthy lifestyle which includes drinking aloe twice a day, we feel much younger than our "real" age (and look younger so we are told)!

Our Siamese cats, Joshua and Sara Lee, also benefit from aloe. Joshua had several tumorous growths on his tongue and the roof of his mouth, and the holistic veterinarian was unable to find a complete cure for this problem and had even told us that it would never completely go away. I started putting aloe in his food twice a day, and within one week the tumors were completely gone, and they have never returned. Both cats continue to get their daily dose of aloe, and at ages 12 and 13 they are still healthy and frisky.

Thank you for helping our family to stay healthy. I recommend your aloe for everyone, and for their pets, too.

Sincerely,

Sue Blaurock
